Announcement and Call for Papers
June 20 – 21, 2018, Ann Arbor Marriott Ypsilanti at Eagle Crest, MI, USA

Important Dates
Submission deadline: March 4th, 2018
Acceptance notification: April 23rd, 2018
Final paper/presentation slides due: June 1st, 2018

Steering Committee
Tom Forest, General Motors, tom.m.forest@gm.com
Kevin Harnett, DOT/VOLPE, kevin.harnett@dot.gov
Moritz Minzlaff, ESCRYP'T, moritz.minzlaff@escrypt.com
André Weimerskirch, Lear Corporation, aweimerskirch@lear.com

Program Committee
Ansaf Alrabady, FCA, USA
Angela Barber, Mitsubishi, USA
Lisa Boran, Ford, USA
Carsten Büttner, Opel, Germany
Benedikt Brecht, VW, USA
Justin Cappos, NYU, USA
Matt Carpenter, GRIMM, USA
Sergio Casadei, VW, USA
Andy Davis, NCC, UK
Karim El Defrawy, HRL, USA
Michael Feiri, ZF TRW, UK
Yaron Galula, Argus, Isreal
Benjamin Glas, Porsche, Germany
Jorge Guajardo, Bosch, USA
Karl Heimer, USA
Markus Ihle, Bosch, Germany
Di Jin, General Motors, USA
Urban Jonson, NMFTA, USA
Bill Latin, Green Hills Software, USA
Suzanne Lightman, NIST, USA
Bill Mazzara, FCA, USA
Damon McCoy, NYU, USA
Ira McDonald, High North, USA
Dave New, FCA, USA
Aleksey Nogin, HRL, USA
Hisashi Oguma, Toyota ITC Ltd., Japan
David Oswald, University of Birmingham, UK
Jonathan Petit, Onboard Security, USA
Neal Probert, Nissan, USA
Vibhu Sharma, NXP, USA
Anuja Sonalker, STEER Auto Cyber, USA
Alan Tatourian, Intel, USA
Eric Thayer, AIS, USA
Alexander Tschache, VW, Germany
Mike Westra, Ford, USA
Lars Wolleschensky, Lear Corporation, USA
Xin Ye, Ford, USA

Overview and Topics

Information technology has become the driving force behind most innovation in the automotive industry, supporting connectivity, infotainment, and automation applications. The situation is similar for commercial vehicles.

A crucial aspect of most automotive electronic applications is cybersecurity. Cybersecurity can enable new innovation and business models but, as demonstrated recently by various researchers, cybersecurity issues can jeopardize those innovations and even potentially endanger safety.

The escar series of workshops, held annually in Europe, the USA, and Asia, has established itself as the premier forum for information, discussion and exchange of ideas on all aspects of vehicle cybersecurity and privacy. As in previous years, the program will include invited talks, but we will accept submitted papers and talks in the following areas:

- Cybersecurity-related engineering, formal methods, software assurance, development & validation, and security standardization
- Cybersecurity of sensors and cyber-physical systems
- Design of resilient vehicle architectures and applications
- Privacy and data protection issues in vehicular settings
- Vehicular hardware security and hardware security modules
- Security of vehicular communications (on-board, passenger, and V2X)
- Security of vehicle application platforms
- Vehicle cyber intrusion detection systems, forensics, and incident response
- Security of legally mandated applications (e.g., event data recorder, tachograph)
- Security of automotive cloud-based infrastructure
- Security economics
- Security of road pricing, restricted areas access and vehicle monitoring
- Security of vehicle theft prevention and theft response solutions
- Security of vehicular rights control and audit (e.g., feature activation)
- Security of emergent technologies (e.g., automated driving, electric vehicles)
- Cybersecurity of commercial vehicles and medium- and heavy-duty trucks
- Vehicle-related information sharing and vulnerability coordination
- Automotive reverse engineering and penetration testing
- Security of vehicle-driven business, maintenance, and service models
Instructions for Paper Submission

Theoretical/scientific articles, case studies and descriptions of real-world experience are welcome. All submissions will be peer-reviewed. Prospective authors should contact one of steering committee members in case they have a doubt about the appropriateness of their submission for the conference. Two types of submissions will be accepted:

**Full papers of up to 15 pages:**
This can be, for example, new research results, case studies, or state-of-the-art reports. The value to the escar community should be clearly demonstrated.

**Extended abstracts of 3 or more full pages:**
This category is geared towards contributions from industry and government. These will consist of a presentation only - no full paper will be required. The abstract must be at least 3 full pages and should clearly outline the content of the planned presentation and its value to the escar community.

**Important Note 1:** Extended abstracts of less than 3 full pages will be rejected without review. Marketing driven submissions and submissions that lack details to enable a review were not well received and almost always rejected in the past.

**Important Note 2:** For both submission types the text must be in English with a font size of at least 10pt. **Submissions must be anonymous with no identifying features on the submissions (such as obvious references).**

**Important Note 3:** Please ensure that you are able to provide the presentation slides by the deadline listed above.

Submissions must be in PDF format and will be accepted at escar’s submission site: [https://www.easychair.org/conferences/?conf=escarusa2018](https://www.easychair.org/conferences/?conf=escarusa2018)
