

17th escar Europe - The World's Leading Automotive Cyber Security Conference
November 19 and 20, 2019, Stuttgart, Germany

Call for Papers – escar Europe 2019

Overview and Topics

Information technology is the driving force behind most innovations in the automotive industry. Today, even compact vehicles have a few tens of interconnected microprocessors with up to several hundred megabytes of software and integrated communication capabilities to the outside world. The situation is similar for commercial vehicles such as trucks and offhighway vehicles.

One crucial aspect of many IT applications in vehicles is IT security. Whereas IT safety is a relatively well established (if not necessarily well understood) field, the protection of automotive IT systems against manipulations has more recently started to emerge. At the same time, security will be an enabling technology for many – perhaps for most – future automotive IT applications. IT security will increase both, reliability and safety, while enabling and protecting various new business models.

The escar conference has established itself as the premier forum for information, discussion and exchange of ideas between academia and industry in this innovative field. As in previous years, the program will include invited talks and submitted papers in the following security related areas.

- Security in the automotive life cycle, e.g., security engineering, safety & security co-design, formal methods, development & validation tools, security standardization and security economics for automotive domain
- Security technologies for automotive components and networks such as hardware security, OTA, sensors, microkernels, security architectures for automotive platforms, biometrics, CAN-bus security, gateways, immobilizer, access, V2X, tolling, intrusion detection, monitoring, automotive SIEM, etc.
- Future security technologies with application to automotive, e.g., distributed ledger technology, PUFs, AI, post quantum algorithms, etc.
- Proof-of-concepts and architectures for security of automotive systems and subsystems, e.g., automotive ECUs and platforms, handling big data, highly-automated and autonomous vehicles, electric vehicles and their backend infrastructures, cloud connection, etc.
- Security Analysis, e.g., car hacking, protocol analysis, risk analysis, etc.
- Further topics such as usability design, legal aspects, privacy and data protection, security for other transport systems like railway or aerospace

Instructions for Paper Submission

Theoretical/scientific articles, case studies and descriptions of real-world experience are welcome. All submissions will be peer-reviewed. Prospective authors should contact one of the steering committee members in case they have a doubt about the appropriateness of their submission for the conference. Two types of submissions are possible.

17th escar Europe - The World's Leading Automotive Cyber Security Conference
November 19 and 20, 2019, Stuttgart, Germany

Scientific track: full papers of up to 15 pages

This can be, for example, new research results, case studies, or state-of-the-art reports. These paper will undergo a full peer-review and will be included in the proceedings of escar and have a citable DOI. The value to the escar community should be clearly demonstrated.

Industrial track: extended abstracts of 3 – 4 full pages

This category is geared towards contributions from industry and government. These will consist of presentation only – no full paper will be required. The abstract must be at least 3 full pages and should clearly outline the content of the planned presentation and its value to the escar community. Abstracts will be part of the proceedings handed out at the conference, but will not be part of the online-proceedings and will not have a DOI.

Important Note 1: Extended abstracts of less than 3 full pages will be rejected without review. Marketing driven submissions and submissions that lack details to enable a review were not well received and almost always rejected in the past.

Important Note 2: For both submission types the text must be in English with a font size of at least 10pt. Submissions must be **anonymous with no identifying features** on the submissions (such as obvious references).

Important Note 3: All submissions must use the template provided on the website. Templates are available either in Word or LaTeX format.

Submissions must be in PDF format and will be accepted at escar's submission site:

<https://easychair.org/conferences/?conf=escareurope2019>

Important Dates

Submission deadline: June 15th, 2019

Acceptance notification: July 31st, 2019

Final paper/presentation slides due: August 31st, 2019

Programme and Registration Information

Complete programme and registration information will be available soon on the **escar website**. From there you can also join our mailing list to receive the latest escar conference information.
